## Quiz 4 (22计科-人工大数据、系统方向+辅修)

- •请对布尔表达式:
  - a<(not b) and c<d or e<f and g<h进行(1)直接计算
  - a<b and c<d or e<f and g<h进行(2)短路计算(含拉链与回填)
- 其翻译方案分别见下页。
- 提示: 须严格按照运算符的优先级进行翻译。

## a<(not b) and c<d or e<f and g<h

```
(1) \ E \rightarrow E^1 \ \text{or} \ E^2 \qquad \{ \ E.place := newtemp \ ; emit \ (or \ , E^1.place \ , E^2.place \ , E.place \ ) \} (2) \ E \rightarrow E^1 \ \text{and} \ E^2 \qquad \{ \ E.place := newtemp \ ; emit \ (and \ , E^1.place \ , E^2.place \ , E.place \ ) \} (3) \ E \rightarrow \text{not} \ E^1 \qquad \{ \ E.place := newtemp \ ; emit \ (not \ , E^1.place \ , \dots , E.place \ ) \} (4) \ E \rightarrow (E^1) \qquad \{ \ E.place := newtemp \ ; emit \ (jrop \ , id_1.place \ , id_2.place \ , nextstat+3 \ ) \ ; emit \ (:=, 0 \ , - \ , E.place \ ) \ ; emit \ (:=, 1 \ , - \ , E.place \ ) \} (6) \ E \rightarrow true \qquad \{ \ E.place := newtemp \ ; emit \ (:=, 1, - \ , E.place \ ) \} (7) \ E \rightarrow false \qquad \{ \ E.place := newtemp \ ; emit \ (:=, 0, - \ , E.place \ ) \}
```

## a<b and c<d or e<f and g<h

```
(1) E \rightarrow E^1 or E^2
                                             { E.codebegin: = E1.codebegin; backpatch (E1.false, E2.codebegin);
                                              E.true: = merge (E1.true, E2.true); E.false: = E2.false}
                         (2) E \rightarrow E^1 and E^2 { E.codebegin:=E^1.codebigin; backpatch (E^1.true, E^2.codebegin);
                                              E.true:=E^2.true; E.false:=merge ( E^1.fasle, E^2.false ) }
                                              { E.codebegin: =E<sup>1</sup>.codebegin; E.true: =E<sup>1</sup>.false; E.false: =E<sup>1</sup>.true }
                         (3) E \rightarrow not E^1
(2) 短路计算
                                              { E.codebegin:=E^1.codebegin; E.true:=E^1.true; E.false:=E^1.false}
                        (4) \to (E^1)
     (含回填)
                         (5) E \rightarrow id_1 \text{ rop } id_2 { E.codebegin:=nextstat; E.true:=nextstat; E.false:=nextstat+1;
                                              emit (jrop, id<sub>1</sub>.place, id<sub>2</sub>.place, (0)); emit (jump, (-,-,0))
                         (6) E \rightarrow true
                                              { E.codebegin:=nextstat; E.true:=nextstat;
                                              E.false: = 0; emit (jump, -, -, 0)
                                              { E.codebegin:=nextstat; E.false:=nextstat;
                         (7) E \rightarrow false
                                              E.true:=0; emit (jump,-,-,0) }
```
